INNOVATORS
WORLD

THE FUTURE IS NOT JUST TO BE DISCOVERED. IT IS TO BE CREATED.

A long-term school partnership for career exploration, innovation and student agency

Our promise to schools

One connected journey from curiosity to capability.

For students

Explore interests, try unfamiliar challenges and reflect on what fits.

For educators

Ready-to-facilitate activities, structured observations and showcase opportunities.

For schools

A distinctive, visible innovation programme with measurable participation.

What is Innovators World?

INNOVATORS WORLD

A learning ecosystem that helps young people observe the world, ask better questions, imagine possibilities and build ideas through practical exploration.

Our role: enable exploration, not label children or promise predetermined careers.

The Innovators World learning method

01 OBSERVE

02 QUESTION

03 IMAGINE

04 CREATE

05 TEST

06 IMPROVE

A repeatable classroom-to-real-world cycle — ideas are improved through evidence and reflection.

A broader journey of growth

Observe → Question → Analyse → Imagine → Create → Test → Lead → Mentor

Discover

Notice problems, interests and possibilities.

Develop

Build ideas, prototypes and confidence through practice.

Contribute

Share, lead and support the next generation.

Career Discovery: beyond “What job?”

Help students explore what interests them, how they like to act, what they value and where they may want to explore further.

Important: CDA is still undergoing validation and is not offered as a live assessment. School pilots or access require separate approval, safeguarding and consent arrangements.

15 Career Worlds. More doors to explore.

- Technology & Computing
- Business & Entrepreneurship
- Education & Human Development
- Science & Discovery
- Finance & Economics
- Culture, Arts & Heritage
- Engineering & Building
- Design & Creative Industries
- Food & Hospitality
- Health & Human Wellbeing
- Media & Communication
- Exploration, Transport & Space
- Life, Earth & Environment
- Society, Law & Public Affairs
- Skilled Trades & Applied Craft

The school Innovation Lab

From classroom curiosity to tangible student work

Observe & question

Identify everyday challenges in school, home or community.

Imagine & create

Sketch, model, build or describe ideas with accessible materials.

Test & improve

Seek feedback, reflect, refine and present what was learned.

EXAMPLE PROGRAMME

A 10-day launch experience

1 Observe	**2 Question**	**3 Analyse**	**4 Imagine**	**5 Create**
6 Prototype	**7 Test**	**8 Improve**	**9 Present**	**10 Celebrate**

Illustrative school lab schedule; final programme is adapted to age group, timetable and resources.

STUDENT VALUE

Why students will engage

Choice and voice

Different materials, interests and ways of expressing ideas.

Confidence through making

Progress is visible through attempts, reflection and improvement.

Exploration without labels

No fixed career verdict, ranking or one-size-fits-all path.

Real-world relevance

Challenges connect learning to the student’s environment.

Collaboration

Students learn to seek feedback and acknowledge help.

Showcase moments

Families see the work and thinking behind each idea.

INSTITUTIONAL VALUE

Why schools and teachers benefit

A distinctive offering

A credible innovation identity that can be demonstrated to families.

Practical facilitation

Age-appropriate activity briefs and clear session structure.

School visibility

Student showcases and agreed communication assets.

Parent engagement

Open days and reflection conversations around student work.

Flexible deployment

Start with a pilot; extend to clubs, terms and annual programmes.

Responsible delivery

Consent, child safeguarding and honest programme claims.

Partnership models

DISCOVER • Pilot

One cohort · short workshop or 10-day Innovation Lab · review and showcase.

GROW • Term partnership

Recurring lab sessions · teacher coordination · student project milestones.

EMBED • Annual partner

Year-round calendar · showcase events · teacher enablement · periodic review.

A 12-month school partnership roadmap

MONTHS 1–2

Discovery meeting, scope, permissions and pilot.

MONTHS 3–4

Pilot delivery, student work and school feedback.

MONTHS 5–8

Refine and expand to a term programme.

MONTHS 9–12

Showcase, outcomes review and renewal decision.

PROPOSED PREFERENTIAL TERMS

Founding School Partnership Offer

A meaningful advantage for schools that help shape the first cohort.

20% OFF

Proposed discount on the agreed first Innovation Lab pilot.

25% OFF

Proposed discount on eligible annual school programme fees.

15% OFF

Proposed partner rate on eligible future family services, only when approved and available.

Illustrative discounts only. Base prices, eligibility, duration and exclusions require a written commercial quotation. No discount implies CDA availability.

What we measure together

Participation

Students reached, attendance and activity completion.

Learning artefacts

Questions, sketches, models, prototypes and reflections.

School feedback

Teacher observations and student/parent experience.

Programme improvement

What worked, barriers and next-cycle adjustments.

What a school can expect from us

Co-design

Agree age groups, schedules, responsibilities and resources.

Safeguarding

Consent, supervision, appropriate data handling and permissions.

Transparency

Separate available programmes from candidate assessments.

Review

Document participation, learning evidence and next steps.

Start with one school. Build a movement.

LET’S BUILD YOUR SCHOOL’S INNOVATION JOURNEY.

Proposed next step: a 30-minute leadership discussion to design a pilot for your school.
